

SHARING VIDEOS

Activity overview: In this activity, you will brainstorm ways to collect videos that would be helpful to other education specialists or your teaching team.

Directions: Think about video examples that would capture ongoing activities in your classroom. Which specific video clips would you want to share with the three people below?

The Speech and Language Pathologist

Think about which activities would show expressive language development (children playing in the house area, etc.). Which videos would be most helpful to the speech and language pathologist? Write your ideas below.

The Special Educator

Think about an IEP objective for a specific child in your classroom: for example, a child who is struggling with transitions. One way to monitor progress could be to record the child's transition back into the classroom after being on the playground. Which videos could you share with the special education teacher? Write your ideas below.

Another specialist or team member

What specific activities could you record to share with other specialists or team members? Write your ideas below.
